LEARNING SAMPLE

Understanding TRA and Taxes

A simple visual lesson using people, everyday activities and easy language.

In this lesson

1. What TRA does
2. Who a taxpayer is
3. What TIN means
4. Why receipts and records matter
5. Why people pay taxes

Learn one idea at a time.

Designed for citizens, students and new entrepreneurs.

LESSON 1

What is TRA?

TRA stands for Tanzania Revenue Authority.

Simple meaning

TRA is the authority responsible for administering taxes and supporting taxpayers with official information and services.

What people can do

- Learn about tax responsibilities
- Access official tax services
- Get guidance and taxpayer education

Remember

TRA is not only about collecting tax - taxpayer education and service are also important.

LESSON 2

Taxpayer and TIN

Two terms you will hear often when learning about tax.

Taxpayer

A taxpayer is a person or business with a tax responsibility. Examples may include employees, shop owners, freelancers and companies.

TIN

TIN means Taxpayer Identification Number. It is used to identify a taxpayer when accessing and using tax services.

LESSON 3

Receipts and EFD/VFD

A simple shop transaction can teach an important tax habit.

When you sell

Record the sale and issue a receipt.

When you buy

Ask for and keep the receipt.

Why it matters

Receipts support clear records and responsible business practice.

LESSON 4

Keep Records and Use Official Channels

Good records make it easier to understand what is happening in your business.

1. Record

Write down sales and business expenses.

Learn more: TRA Paying Taxes

2. Organise

Keep receipts and supporting records together.

3. Use official channels

Access tax services and make payments through approved TRA channels.

LESSON 5

Why Do People Pay Taxes?

Taxes form part of shared public revenue used through government planning and budgeting.

Education

Public revenue helps support education services and infrastructure.

Health

It can support public health services and facilities.

Infrastructure

Roads, water and other public services support communities and economic activity.

Important

One individual payment does not directly fund one specific project. Public revenue is pooled and allocated through official processes.

RECAP

What should you remember?

A short review before the lesson ends.

Five key ideas

1. TRA administers taxes and provides taxpayer services.

2. A taxpayer is a person or business with a tax responsibility.

3. TIN identifies a taxpayer in tax services.

4. Receipts and records support responsible business practice.

5. Taxes contribute to shared public revenue and national development.
